

AQUAMOVES CAR PARK REDEVELOPMENT

Staged Construction Program

The Aquamoves Car Park redevelopment will begin on Monday 15 June, with an anticipated completion date of Friday 30 October. The diagram below shows a three stage program indicating the order in which the redevelopment will be undertaken. It is expected that at all times throughout the construction, a minimum of 65 formal parks will be available in close proximity to Aquamoves. Alternative parking options along the north of Tom Collins Drive and south along the river bank will also be available. We appreciate that the construction period will cause inconvenience to our valued members and patrons, however we seek your patience and cooperation throughout this process. Although a plan is in place, please be mindful that various factors will impact on the ability to keep to this plan and as such, changes are likely to occur. We will ensure that communication is provided to keep you informed as the project develops. We look forward to providing a greatly improved car park for our community to use.

Aquamoves is proudly provided by Greater Shepparton City Council

Stage 1 – Construct Northern Section

- Expected timeframe: mid-June to mid/late July
- Approximately 77 formal car parks available
- Informal area south of the large trees available for parking
