# Supervision

Birthday Parties will often require you to supervise children whose swimming ability you may not be aware of. It is instrumental to put their safety first.

The Watch around Water program is now operating at Aquamoves and requires you to watch the children under your care at all times. Active supervision is not an occasional glance while reading the newspaper or talking to a friend.

Please understand the lifeguards' role is to supervise and provide incident response to the overall facility but they are not responsible for individual children.

**One adult needs to be in the water within arms reach for every four children under the age of 5 years.**

**One adult needs to be actively supervising for every four children under the age of 10.**

Please be aware that an unsupervised child will be removed from the water.
